Manual Verification Worksheet

Check this packet's section map against your purchased 2026 manual

DRAFT - the CARF section map behind this document has NOT been checked against the purchased manual. Set manual_verified: true before use.

Program: Community Integration
Completing this is what clears the DRAFT stamp
Generated 2026-09-06

Why this worksheet exists

Nobody who built this packet has read your CARF manual. CARF's standards are copyrighted and sold only by CARF, so **this packet contains no CARF standard text** — it is organized to the manual's long-standing outline and written from scratch.

That outline has been stable for years and is very probably right. **Probably is not good enough to build an accreditation on.** This worksheet is how a human with the real manual open turns an assumption into a checked fact.

ONE RULE WHILE YOU WORK: DO NOT COPY TEXT OUT OF THE MANUAL INTO THIS SHEET.

Write the **standard number** and **your own few words** about what it requires. Copying CARF's wording into a document you then circulate is a copyright problem, and it is not necessary — a number and a short note is all anyone needs to act on.

How to do it

1. Open the purchased manual at its contents pages, and open `\_engine/content/meta/standards\_map.json` beside it.
2. Work the section check below, then one page per area. Expect it to take an hour or two.
3. Where a letter or a name differs, write what the manual actually says, then correct `standards\_map.json` to match. The whole packet re-labels itself on the next build.
4. Where you find a standard the bundled policies do not cover, write it in box 5 of that page. Those go straight onto the self-study checklist as gaps.
5. Sign the last page, set `manual\_verified: true` in `provider.json`, and rebuild. The DRAFT stamp disappears.

Do not sign the last page unless you actually did every page. The DRAFT stamp is a protection, not an inconvenience: it stops a document going to a surveyor claiming an alignment nobody confirmed.

Part 1 — The three sections

Before the areas, confirm the top-level structure.

#	What this packet assumes	Correct in your manual?	If different, what it says	Manual page
Section 1	ASPIRE to Excellence — applies to: Every CARF-accredited organization, every program.	☐ Yes ☐ No		
Section 2	General Program Standards — applies to: Every behavioral health program the organization seeks to accredit.	☐ Yes ☐ No		
Section 3	Core Treatment Program Standards — applies to: Only the treatment program(s) named on the survey application. Community Integration is 3.C, page 185.	☐ Yes ☐ No		
Section 4	Core Support Program Standards — applies to: Support programs - assessment and referral, community housing, prevention, supported living and others. Not applicable unless one is on the application.	☐ Yes ☐ No		
Section 5	Specialty Designation Standards — applies to: Optional designations layered on a program. CONSUMER-RUN IS 5.D, PAGE 318 - the closest thing CARF has to a peer-run designation. Worth checking if the agency is peer-directed.	☐ Yes ☐ No		
Section 6	Certified Community Behavioral Health Clinic Program Standards — applies to: CCBHCs only.	☐ Yes ☐ No		

This edition's changes

CARF publishes a summary of what changed for the edition. Find it and record anything that touches your program — new standards, deleted standards, renamed areas.

Part 1b — Which areas to read first

You have limited hours. Spend them where the risk is. This table divides each area's **page count in the manual** by **how many policies this packet gives you for it**. A high number means a lot of manual and not much packet — that is where something is most likely uncovered.

PAGE COUNT IS A PROXY, NOT A MEASUREMENT. It says where to look, not what is wrong.

Page spans are taken from the supplied table of contents: each area runs to the page before the next heading. Work top to bottom.

Order	Area	Name	Pages in manual	Policies here	Pages per policy	Read first?	Done (date)
1	1.L	Performance Measurement and Management	12	1	12.0	YES — highest risk	
2	1.B	Governance (Optional)	8	1	8.0	YES — highest risk	
3	2.A	Program/Service Structure	16	2	8.0	YES — highest risk	
4	2.E	Medication Use	8	1	8.0	YES — highest risk	
5	2.I	Service Delivery Using Information and Communication Technologies	6	1	6.0	YES — highest risk	
6	2.B	Screening and Access to Services	9	2	4.5	Medium

21	1.A	Leadership	10	7	1.4	Lower	
22	1.J	Rights of Persons Served	3	4	0.8	Lower	
23	3.C	Community Integration	2	5	0.4	Lower	

Also unread by anyone: the Section 1 front matter (pages 29–30) and the Section 2 front matter (pages 111–115), which carry applicability rules — who each section applies to and how it is used. Five pages that can change which standards count for you at all.

Part 2 — Area by area

25 pages follow, one per area. Page 3.PEER is the exception and says so on its own page.

Area 1.A — Leadership

1. Does this area appear in your manual?

☐ Yes — same letter, same name

☐ Yes — but renamed to: _____

☐ Yes — but renumbered to: _____

☐ Merged into: _____

☐ Split into: _____

☐ Not in my manual at all

Manual page numbers: _____ Number of standards in this area: _____

2. What this packet assumes the area covers

Leadership is identified, accountable, and ethical. There is a written code of ethics, a way to raise concerns without retaliation, a corporate compliance program, and evidence that leadership considers cultural competency and the needs of the people served when making decisions.

Does that match your manual? ☐ Yes ☐ Mostly ☐ No

If mostly or no, what is different (your words, not the manual's):

3. What this packet gives you for it

Document	Type	Covers the standard(s) numbered	Enough?
1A-01 Leadership Structure and Accountability	Policy		☐ Y ☐ N

Area 1.B — Governance (Optional)

The 2026 manual titles this area 'Governance (Optional)'. Confirm with the CARF resource specialist whether the agency is electing it before building this tab.

1. Does this area appear in your manual?

☐ Yes — same letter, same name

☐ Yes — but renamed to: _____

☐ Yes — but renumbered to: _____

☐ Merged into: _____

☐ Split into: _____

☐ Not in my manual at all

Manual page numbers: _____ Number of standards in this area: _____

2. What this packet assumes the area covers

If the organization has a governing board, the board has written duties, meets, keeps minutes, evaluates the CEO, evaluates itself, and manages conflicts of interest. A sole-owner agency documents who performs these governance functions instead.

Does that match your manual? ☐ Yes ☐ Mostly ☐ No

If mostly or no, what is different (your words, not the manual's):

3. What this packet gives you for it

Document	Type	Covers the standard(s) numbered	Enough?

☐ Not in my manual at all

Manual page numbers: _____ Number of standards in this area: _____

2. What this packet assumes the area covers

A written strategic plan exists that was built from real inputs: what is happening in the environment, what stakeholders expect, financial reality, technology, workforce, and risk. It is reviewed at least annually and the review is documented.

Does that match your manual? ☐ Yes ☐ Mostly ☐ No

If mostly or no, what is different (your words, not the manual's):

☐ Yes — but renamed to: _____

☐ Yes — but renumbered to: _____

☐ Merged into: _____

☐ Split into: _____

☐ Not in my manual at all

Manual page numbers: _____ Number of standards in this area: _____

2. What this packet assumes the area covers

Transition planning begins at admission, not at the end. There is a written transition/discharge summary for every person who leaves, including unplanned exits, and a documented attempt at follow-up after discharge with the results recorded and analyzed.

Does that match your manual? ☐ Yes ☐ Mostly ☐ No

If mostly or no, what is different (your words, not the manual's):

2. What this packet assumes the area covers

If the program does not prescribe, dispense, administer, or store medication, that must be stated in writing, and staff must know their limits and what to do about medication questions and adverse reactions. If it does any of those things, a full medication management policy set is required.

Does that match your manual? ☐ Yes ☐ Mostly ☐ No

2. What this packet assumes the area covers

Where any part of the service is delivered by video, phone or other technology, it meets the same standards as in-person service: informed consent specific to the technology, identity and location verified at each contact, an emergency plan for the person's actual location, an approved platform under a business associate agreement, staff trained and assessed as competent in delivering peer support remotely, and documentation that records the modality and both parties' locations.

2. What this packet assumes the area covers

The program helps people participate in community life as they choose - housing, work, education, benefits, relationships, transportation, recreation, health care, and civic life. It is built on the person's own goals, uses natural supports and real community settings rather than segregated ones, and measures actual community participation, not just service contacts.

Area 3.PEER — Peer Workforce Requirements (this skill's own grouping - NOT a CARF area)

THIS IS NOT A CARF AREA — IT IS THIS PACKET'S OWN GROUPING.

Peer support is a workforce and a service model, not a CARF section. There is nothing in the manual numbered 3.PEER. This grouping exists so nothing peer-specific falls between 1.I, 2.A, 2.C and the Section 3 program.

What to check instead: that each policy listed below has a home in a real area of your manual, and write that area beside it.

1. Does this area appear in your manual?

☐ Yes — same letter, same name

☐ Yes — but renamed to: _____

☐ Yes — but renumbered to: _____

☐ Merged into: _____

☐ Split into: _____

☐ Not in my manual at all

Manual page numbers: _____ Number of standards in this area: _____

2. What this packet assumes the area covers

Peer support is a WORKFORCE and a service model, not a separate CARF program section. Its requirements are enforced through 1.I (credential, competency, supervision), 2.A (program description and staffing), 2.C (person-centered planning done WITH the person), and the Section 3 program. This area exists so nothing peer-specific falls between the cracks: lived experience as a job qualification, the state peer credential, self-disclosure boundaries, mutuality, dual-relationship management in small recovery communities, peer staff wellness, and career ladder. CONFIRMED against the 2026 table of contents: there is no Peer Support program in Sections 3 or 4, and CARF's own 2026 Behavioral Health Program Descriptions mention peer support once in 23 pages, as staffing for a crisis contact center. The nearest real CARF home for this material is the CONSUMER-RUN specialty designation at 5.D, page 318 - check whether the agency qualifies.

Area X.TECH — Technology and Information Security - CARF home NOT YET CONFIRMED

X.TECH IS NOT A CARF CODE. It is a holding pen so three real policies are not silently dropped while their placement is unknown. Resolve it before survey.

1. Does this area appear in your manual?

☐ Yes — same letter, same name

☐ Yes — but renamed to: _____

☐ Yes — but renumbered to: _____

☐ Merged into: _____

☐ Split into: _____

☐ Not in my manual at all

Manual page numbers: _____ Number of standards in this area: _____

2. What this packet assumes the area covers

The 2026 Section 1 has NO Technology area - it runs A Leadership to M Performance Improvement with no technology heading. These three policies (technology and system planning, information security, and social media / devices / electronic communication) are good practice and most payers require them, but their home in the manual is unconfirmed. Service delivery BY technology is a different thing and lives at 2.I. FIND THEIR HOME IN APPENDIX A (Required Written Documentation, page 385), which lists every document the manual requires, and move them to whichever area it names.

					☐ Yes

Final sign-off — this is what clears the DRAFT stamp

Sign only if you personally worked every page against the purchased manual.

I confirm that I have compared every area in this worksheet against our purchased CARF Behavioral Health Standards Manual, 2026 edition; that the corrections above have been made to the section map; and that every gap found has been added to the self-study checklist with an owner and a due date.
